I guess one of my recent updates to the site broke the registration process. Thanks to Damien for telling me today. I traced it down and fixed it tonight. Looks like the update removed some necessary fields for the Google Maps part of the profile in the registration process. We should be all set now, so if you tried to register earlier and it failed, please try again.

Remember, the system will notify us AFTER you get your confirmation email AND you click the confirmation link in that, and then an admin will need to confirm your account and then you will be in!

Did I mention it's all free???
